

CUSTOM FABRICATION AND COATINGS

 TANK CONNECTION

EMPLOYEE OWNED. WE CARE MORE.

Do you have custom fabrication and/or custom coating requirements for your existing products and are looking for a new source? Are you getting ready to launch a new product and are unsure where to source your specialty fabrication and coating needs?

Let Tank Connection Help.

Tank Connection is ready to leverage their experience in manufacturing a wide range of industrial storage products to fulfill your custom fabrication and coating needs. Tank Connection has in-house coating capabilities ranging from proprietary powder on powder coating options to a large capacity liquid coating booth. Combined with years of fabricating carbon steel, stainless steel and aluminum components, Tank Connection has a strong history of providing high quality products that exceed the expectations of our clients.
